Professional Experience	**Sr. UI Developer | Lead - Omnie Solutions (I) Pvt Ltd, Sector 2, Noida** *February 2015 – Present*

- Responsible for establishing UX/UI brand standards either from scratch or by adapting the existing website software and graphics packages to deliver a unified user experience across desktop and mobile.
- Front-end development for complex and high-performance components using React, TypeScript & Material-UI, improving application performance.
- Evaluates different alternatives and selects or recommends the one that best meets the business and professional need of the situation.
- Designed and implemented reusable UI components and storybook handling to streamline development efforts across teams.
- Integrated APIs to enhance application functionality and usability.
- Applies theory and experience to decision-making, interprets data for discrepancies and trends, and recognizes subtle patterns, identifies key issues or uses inductive reasoning in complex situations.
- Manage and build a cross-functional team of around 10 web developers, software engineers, and UI developers and provide coaching and mentorship to drive professional development.
- Collaborated with cross-functional teams, including designers, QA and backend developers, to deliver responsive and user-friendly application.
- Ensured accessibility (WCAG) and responsive design across all platforms.
- Mentored junior developers and conducted code reviews to maintain best practices.

Associate - Magnon TBWA Solutions Pvt Ltd, Sector 63, Noida
May 2014 – February 2015

- Implementing the design of the various platforms and coordinating with others on the issues that evolve while developing along with the testing of the website and rectifying solutions if any technical observations found.
- Coordinated with UX designers and Web developers to create many projects based on e-commerce websites compatible across desktop and mobile using HTML, CSS and JavaScript.
- Upload the site onto the server & register it with different search engines. Testing a website and identify, if any, technical problems.
- Migrated legacy frontend codebase to modern frameworks, improving maintainability

Web Developer - Creative Web Logix Pvt Ltd, Sector 63, Noida
December 2012 – May 2014

- Generates and explores different, creative, imaginative or unique approaches, challenges conventional practices, thinks outside the box.
- Worked on optimizing the websites and code reviewing to increase the speed of the webpages over the internet.
- Converting template into XHTML, HTML5, CSS, W3C validations, DIV based layout/ Website, div & (ul, li), em based layout
- Created cross-browser compatible & SEO friendly site using HTML5 semantic tags.

Projects	**Specialty Pharmacy, Optum (UHG)**
	Environment: *React, Next, Node JS, Storybook, Material UI, Redux, TypeScript, Drupal, SCSS, JavaScript, GIT, Figma*
	▪ Integrated Next.js with Drupal CMS to build seamless, dynamic pages and components using Drupal API (JSON), enabling flexibility and scalability.
	▪ Upgraded the application and storybook from MUI4 to MUI5 without breaking the existing UI component designs and layout.
	▪ Utilized Redux for efficient data fetching and state management.
	▪ Developed micro frontend libraries & integrated them into pharmacy app.
	▪ Integrated Adobe Analytics to track user on component and page basis.
	▪ Created test data to validate the dev component using Oracle IRIS tool.
	Central Admin Console Dashboard, Lixil
	Environment: *React, Next JS, Node JS, Material UI, SCSS, JavaScript, GIT, GULP, Figma*
	▪ Created the fully functional dashboard which is managed by the admin that includes product inventory, checkout, and consultant board as per needs.
	▪ Integrated Next.js with both App and Pages Router, redirects, rewrites, next config features, components for optimal routing and user experience.
	▪ Developed all functional components from scratch along with the Backend team by using React-Material UI, APIs, and many React JS features.
	▪ Used GIT for version control and Jira for tasks & bugs management.
	Alpha Coach
	URL - https://www.alphacoach.app
	Environment: *React, Next JS, Node JS, Material UI, WordPress, JavaScript, Grunt, Figma*
	▪ Developed and maintain scalable and efficient web solutions to meet business requirements, ensuring high performance and reliability.
	▪ Developed the website using Next and React JS and WordPress for Blog.
	▪ Created the pages and web components using MUI5 theme for frontend.
	▪ Coordinate with UI/UX designers and Backend API developers (Python) to ensure integration and optimal performance of front-end components.
	American Standard US, Lixil
	URL - https://www.americanstandard-us.com
	Environment: *Sitecore, HTML5, CSS3, jQuery, JavaScript, Bootstrap, SASS, XD, GIT, Rally*
	▪ Implemented frontend solution for the Sitecore Commerce 9.3 with SXA.
	▪ Setup gulp tasks to make themes and added base themes for re-usability purposes and inherited base themes using SASS to the main theme.
	▪ Made use of SASS for styling to follow the clean design and modern development practice of FE that includes component-based style focusing on one component.
	▪ Developed 90% custom components due to the complications of project.
	Dotcom Blinds
	URL - https://www.dotcomblinds.com
	Environment: *Magento, HTML5, CSS3, LESS, JavaScript, Grunt, GIT, Adobe XD, Jira*
	▪ Built the front end of an e-commerce website in Magento 2 for an online retailer (UK-based), by overriding its existing base theme components along with integrating the custom HTML pages with them.
	▪ Created the pixel-perfect website with HTML, LESS-CSS, and JavaScript with the help of jQuery parallax library effect and CSS3 animations as per the client's new need and design.
